Ear Seeds Application	\$15

Reflexology

(Requires 1 Week Notice)

1/2 Hour \$30

What is Massage Therapy?

Many people find that massage therapy brings a temporary feeling of well-being and relaxation. It is also used to

relieve pain and stiffness, increase mobility, rehabilitate injured muscles, & reduce the pain of headaches and backaches.

Supporters of massage therapy believe that massage therapy can help reduce stress, anxiety, and pain in people who have serious illnesses such as cancer.

It is also known to help relax muscles.

What is Acupuncture?

Acupuncture is a safe and effective form of Chinese medicine that has been practiced for centuries. It's based on the understanding that energy, or chi, flows through and around the body along pathways called meridians.

Very thin needles are inserted at specific acupuncture points, increasing the activity of the body's natural pain killers and restoring the balance of energy.

This helps the body to repair and maintain its well-being.

Please call to make an appointment.

Walk-ins are welcomed, but depends on availability.
